VOL. XXIII

RENO, WASHOE COUNTY, NEVADA, WEDNESDAY, OCTOBER 12, 1887.

NO. 165

A Luxury and Necessity For rich and poor who wish to wish to resort to bitter nuseous liver medicines and catharics, is the concentrated California liquid fruit remedy, Syrup of Figs. 50c. and \$1 bottles for sale by Wm. Pinniger, Reno, Nevada. enjoy good health, and who do not

An Absolute Cure. ORIGINAL ABIETINE OINT-MENT is only put up in large two-ound tin boxes, and is an absolute cure for old sores, burns, wounds, chapped hands, and akin eruptions. Will positively cure all kinds of piles. Ask for the ORIGINAL ABIETINE OINTMENT. Sold by Osburn & Shoemaker at 25 cents per box—by mail 30 cents.

The Only Perfect Remedy For babitual constipation, dys-

Are spent every year by the people of this State for worthless medicines for the cure of throat and lung diseases, when we know that if they would only invest \$1 in SANTA ABIE, the new California diseovery for consumption and kindred complaints, they would in this pleasant remedy find relief. It is recommended by ministers, physicians and public speakers of the Golden State. Soldand guaranteed by Osburn & Shoemaker, Reno, Nevada, at \$1 a bottle. Three for \$2.50.

The most stubborn case of estarth will speedily succumb to CALIFORNIA CAT-R-CURE. Six months' treatment for \$1. By mail \$1 10. Thousands of Pollars,

When baby was sick, we gave her Castoria, When she was a Child she cried for Castoria, When she became Miss, she clung to Castoria, When she had Children, she gave them Castoria

Happiness and Health, Are important problems, the former depending greatly on the latter. Everyone is familiar with the healthy properties of fruit, and no one can afford to be sick and mis-erable while the pleasant California concentrated liquid fruit remedy, Syrup of Figs, may be had of our enterprising druggist, Wm. Pinni-ger, Reno, Nev.

Brace Up. You are feeling depressed, your appe-tite is poor, you are bothered with head ache, you are fidgetty, nervous, and gen ache, you are fidgetty, nervous, and generally out of sorts, and want to brace up. Brace up, but not with stimulants, spring medicines, or bitters, which have for their basis very cheap, bad whisky, and which stimulate you for an hour, and leaves you in worst condition than before. What you want is an alterative that will purify your blood, start healthy action of liver and kidneys, restore your vitality, and give renewed health and strength. Such a medi, ine you will find in Flectric Bitters and only 50 cents a bottle at 8. J. Hodgkinson & Co's Drug Store.

About Controlling Sex. St. Louis Journal of Agricults

In the report of the University of is evident that there are no certain and cavities leading from them.

For several years past different suggested modes of controlling sex in breeding domesticated animals have been kept in mind in the cattle breeding on the university structions, all are bad. All ought to be

has been to suggest an explanation pepsia and kindred ills, is the of some of the many positive statefamous California liquid fruit rem- ments that a given theory has been edy, Syrup of Figs. It strengthens as well as cleanses the system, it is easily taken and perfectly harmless. Large bottles for sale by Wm. Pinniger, Reno, Nevada. in accordance with any one method or theory for controlling sex, there would have been a natural disposition to pronounce the theory proven true or false.

At times there seems a striking tendency to the production of animals of one sex, either as the progeny of the sire or of one or more females. The Shorthorn bull Oxford-Mazurka(40,199)gave us nearly three heifers to one bull calf for three successive years. On the other hand, a majority of the calves of his get during the last few months he was in use were bulls. Three Shorthorn cows in the herd have given six, five and four calves of the same sex in succession; then dropped one oppo-

We have not found that reliance can be placed in the theories that sex can be controlled by service near commencement or near close of heat; before or after milking, or by having the animals coupled of different ages. On the other hand, we have not in a series of

hand, we have not in a series of years, been able to say positively that what is known as the Stuyvesant theory has been proven incorrect—unless cases of production of twins of opposite sex be counted violation of the theory.

This theory is that conception at alternate periods of heat will produce offspring of different sex. The method of application is: A cow having produced a calf, and it being desired to have the next of the same sex, the cow should be t the same sex, the cow should be served at the second, fourth or sixth heat, until she stands to the service. If a calf of the opposite sex be desired, she should be served at the first, third or fifth heat.

It is not held that our observations prove this theory correct; simply that we have not found, with certainity, exceptions to it in our herds. It not frequently happens that the manifestations of heat in a cow are so electrically heat in a cow are so slight and pass away so quickly that they may not be detected; hence this theory may be incorrectly held to have been

frequently being stated that semen from the right testicle will produce from the right testicle will produce only male, that of the left only female offspring. The left testicle was removed from a boar pig. Three sows afterward bred to him produced litters in each of which were pigs of both sexes in nearly equal number. The castration was done when the pig was quite young, and no other boar could have had access to the sows. In this case the result was directly at variance with the theory.

Brittle Hoofs.

The Boston Transcript gives some good suggestions on the above topic in the following: "Horses are frequently troubled with brittle hoofs, caused by a deficiency of water in the bone. This is caused in various wayserrative powers, Dr. Klog's New Discovery for consumption coughs and colds will be, for a limited time, given away. This offer is not only liberal, but shows anbounded faith in the merits of this great remedy. All who suffer from coughs, colds, consumption, asthma, bronchitis or any affection of the throat, che-t or lungs, are especially requested to call at S. J. Hodgkinson & Co.'s drug store and get a trial bottle free; large bottles \$1. fever of the feet, or the common ior of the foot; exposure to fermonia, leaving the feet covered with mud; or even continued hot or dry weather, or an unhealthy condition will produce this company at San Francisco, Cal., says: trouble in the feet. The horn becomes dry and granulated, Cal., at the condition of the Phonic Catary and Born becomes dry and granulated, Cal., or dry weather, or an unhealthy condition will produce this trouble in the feet. The horn becomes dry and granulated, and separates very easily, crumbling and splintering away until there is scarcely crust enough left to fasten a shee upon. The remedy is, of course, to remove the cause and restore the moisture. Frequent washing of the feet with cold water, with attention to the health, and to give the horse clean bedding and an earth floor to stand upon, or else a deep bed of sawdust will prevent it, or cure it in many cases. Glycerine and water in equal parts is an excellent dressing for the hoofs. And occasional equal parts is an excellent dressing for the hoofs. And occasional soft feed, as bran mash with a lit-tle linseed, is also useful, because it keeps the horse in good health and cool. Tar is sometimes used as a hoof dressing with advantage, but it needs caution in its application.

"You may send the proceed after deducting your commission and all other expenses, in postage stamps," wrote a shipper from the West, who recently sent in a couple of carloads of old cows to Chicago. He was evidently posted on the selling values of cattle at this time.

That is to say, your lungs. Also all you breathing machinery. Very wonderful machinery it is. Not only the larger airpassages, but the thou ands of little tubes

When these are clogged and choked with matter which ought not be there your lungs cannot half do their work And what they do, they cannot do well. Call it cold, cough, croup, pneumonis got rid of. There is just one sure way to One result of these observations get rid of them. That is to take Bosehee's German Syrup, which any druggist will sell you at 75 cents a bottle. Even if everything else has failed us, you may depen-

> Bucklen's Arnica Salve. SIX-PAGE EDITION. WITHIN less than a year the political caldron in Nevada will commence to boil. The people will be called upon to vote for President, successor to Cleveland, Justice Supreme Court, successor to Leonard, and Congressman, successor to Woodburn. Laying aside the Presidential question, who will be our candidates? Although he has had a second term, in all probability Leonard will be a candidate to succeed himself. His probable antagonists in his own party are Boardman, of Washoe, and Woodburn, of Storey. It is well understood that Woodburn, who will have served three terms in Congress, would much prefer the position of Justice to that of Congressman. The possible Democratic candidates for Justice are Stone and Huffaker, of Storey, Creswell, of Lander, Rives, of Eureka, and Sewell, of Esmeralda. Ellis, of Ormsby, possibly might be a candidate were it not that he still has his eye on a seat in the U. S. Senate. The Republican candidates for Congress are by no means certain. If he do not enter the race for Justice of course Woodburn leads all the rest for Congress. Foley is a candidate for the U. S. Senate, but might be induced to accept a nomination for Congress. If Stevens had good health so that he could make the race he would be a most formidable caudidate. Powning says he has no political bee whatever in his bonnet, but this is taken with several grains of allowance. Williams, Congress. Foley is a candidate for eral grains of allowance. Williams, of Ormsby, denies the soft impeachment that he would like Congress, but his friends who know that he million to back it up think him available and his candidacy probable. - Poujade, of Lincoln, too, is mentioned in the list of aspirants for Congressional honors. On the Democratic side it is rumored that Cassidy will again shy his castor in the ring. Westerfield is a nestor in politics and would run like a scared has both the sbility and a half politics and would run like a scared wolf, but he has little hopes of Democratic victory in Nevada next Fall and doesn't propose to run to Waterman has appointed an expert to Fall and doesn't propose to run to lose. McMillan, who was pitted against Woodburn, still retains prestige in his party and may "bob up serenely" in the next Democratic State Convention. Dorsey, of Elko, is a strong man, and his friends in Eastern Nevada say he is just the man to use as the pole to knock down the persimmons. Pike knock down the persimmons. Pike for several years has had an itching to we r a Congressman's shoes

What Hon. Eugene Howell Has to Say of its Possibilities.

Hon. Eugene Howell, of Lincoln county, is in town to-day, on his way to White Pine from California, where he has been rusticating. In an interview this afternoon a GAZETTE reporter elicited some very interesting facts relative to Southern Nevada. He says that if the proposed railroad be extended from Salt Lake to Los Angeles, there will be a big boom in that section. The olive, fig, orange and cotton grow there as well as in any other part of the world; apples are twice as large as those of Oregon and with flavor as rich. The Pahronaga Valley is on an average one mile wide and is 30 miles long, and one of the most fertile of valleys, In this valley in what is known as the Illinois series of mines, Vandervilt, the railroad magnate, and Appleton, the New York millionaire publisher, and others have expended over \$3,000,000 in development work. This part of Nevada has had a much wider advertising than is generally supposed in this end of the State. There are valleys in that section longer than either the Truckee Meadows or the Carson Valley, and it is believed by the people of that vicinity that with the proper railroad facilities the population of Southern Nevada would be greater than that of Western Nevada. mile wide and is 30 miles long, and

Somewhat Mixed. The Austin Reveille says that The Austin Reveille says that Frank Mercer has skipped the country since the indictment was found against him by the Grand Jury in Virginia City. The Reveille has evidently got things mixed. The indicted party is Richard Mercer. The only Frank Mercer in this part of Nevada never had the distinguished honor of being director of a bank.

PRESS DISPATCHES TO THE GARRETE

The President in Nebraska. Omaha, Neb., Oct. 12.—The south ward flight of the Presidential party began at Minneapelis at 10 minutes past 8 this evening. The two ladies of the party retired early, but the President and male members of his resort sat for a comple of hours smoking their cigars and comparing expesummoned to the platform during the evening to receive the greeting of country people, who seemed wide awake all along the line. The train made no stops, but the President appeared wherever there was a crowd and courteously acknowledged its salutes.

more Valley and the two went to Colton, where they stopped at a hotel. Springer registered himself and wife under assumed names. The next morning he was missing, and his wife was found in her room, salutes. riences. The President was frequently

An army of railroad men was on patrol duty on the track, and huge bonfires were burning every half mile on the way.

The sun was just streaking the eastern sky with ribbons of scarlet and pink when all hands were called this morning to prepare for the affair at Sioux city.

morning to prepare for the affair at Sioux city.

A brief half hour was allowed for toilets, and coffee was served before the place was reached. The train was stopped outside the town limits to take on board Mayor Clelland, who, without formality, welcomed the President.

The Publishers and Printers.

CINCINNATI, Oct 12 .- William Aimson, President of the International Typographical Union, announces to fered. When Fleming left White-Typographical Union, announces to all subordinate unions that a meeting of the Executive Council held here today for the purpose of conference and consideration of the nine-hour law adopted at the Buffalo Convention, it was unanimously resolved that a committee of seven be appointed to confer with the committee of the Publishers' Association, which meets in Chicago October 18th to bring about harmony, of the Executive Council held here today for the purpose of conference and

ARRESTED ON SUSPICION.

A Deputy Sheriff of Churchill county arrived in town last evening, having in his charge a men believed to be Wm. Springer, for-merly of Lodi, Cal. As many of our readers probably remember, Springer was a saloon-keeper at Lodi. He married a girl in Livermurdered, her throat having been cut from ear to ear. The man brought to town last night is said by parties here who knew Springer intimately when be resided at Lodi to bear but little resemblance to him, Springer being semblance to him, Springer being taller and better looking. The man says his name is R. Fleming. For some time past he worked for Dave Whiteman, a large rancher in Churchill county, south of Wadsworth. The officers of that county watched him for several weeks, and finally believed they saw in him unmistakable answers to descriptions unplished of Springer. scriptions published of Springer, for whom a reward of \$3,000 is of-

Railway Matters.

It is said that the object of the visit to Ogden of General Superiutendent Fillmore, of the Southern Pacific, and other prominent officials of the road, is to arrange for the running of two overland trains daily.

Squally times are anticipated among the opposing elements of transcontinental passenger tariff. A well-posted railroad official said to a San Francisco Chronicle reporter Monday:

"These lines have got to have a war, and all the proposed transconwar, and all the proposed transcontinental associations, consultations and peace-making negotiations will result in nothing. Rates to the East have been kept up to tariff figures by the Southern Pacific only by the greatest exertion. It seems, however, that nothing will keep the lines east of Ogden and Mojave from dabbling in commissions, which are used by their Eastern connections to cut the rates.

"A combination was entered into to-day between the representatives

"A combination was entered into to-day between the representatives of an Iowa line and an Eastern trunk line by which commissions amounting to \$7 on first-class tickets and \$8 on second-class to New York or other Atlantic seaboard points are to be paid to the passenger of any one bringing in a real ger or any one bringing in a pas-senger. Of course these commissions are not given to everybody. The agents must know their man before they will transact business on anything but a strictly tariff basis. But the cut is made just the same."

Another agent said that the situation was getting more serious daily, and that nothing that might now be done could prevent the impending rate war.

used on the Powning build Brick ing are hoisted from the ground in the same manner that ships are uploaded, the only difference being that a horse is used instead of a steam engine. The hod-carriers are kicking.

—The municipal election in Chatta-nooga, Tenn., to-day resulted in the election of the entire Republican Al-dermanic ticket by about 500 majority. A Democratic Mayor was elected. The city is wild with excitement.

The Streets Will be Cleaned.

Reno, Oc tober 12, 1887.

Editor Gazette—Dea R Sir: A communication in your ps per yesterday entitled "The Streets Will be Cleaned," leads me to believe that my friend, John Corsiglea, would make a mountain out of a mole hill if he could in this, matter of street clea ning.

Notwithstanding Mr. Corsiglea's "general denial," the sin ple facts are these: I sold my horse, cart and crop on my ranch to Mr. Saiv ador Trablo-reserving to myself my to wn customers, who had been paylog me for cleaning the streets. Mr. Trablo subsequently sold the horse and cart to L. Ginochlo, now deceased. Mr. Trablo subsequently sold the horse and cart to L. Ginochlo, now deceased. Mr. Trablo subsequently sold the horse and cart to the said deceased. Again, Mr. Corsiglea has publicly stated that the horse and cart he now drives was for male, but not to me, saying that my mc ney could not buy it.

I can prove the foregoing by at least of show my patrons that I am dispused to do the fair thing in the premise. And the control of the said to the fair thing in the premise. And the control of the said of the fair thing in the premise. Sierra Lager Brewed from selected Chevalier Barley finest Bohemia, Hops of our own importation.

MUTILATING COIN.

Of the many different ways of swindling practiced nowadays upon the public there is probably no one thing so dangerous as counterfeiting. Of late this has been carried on quite extensively in different parts of New England, and in a number of instances the principals have been arrested with all their paraphernalia, convicted and sentenced to penal institutions for various periods. Thinking that the general public would be interested in knowing how some of the "queer" is coined and circulated, a Traveller representative started out with that end in view, and had the good fortune to fall in with a Government official connected with the Secret Service Department, who has had many years' experience in apprehending counterfeiters. When the writer announced his mission the official readily gave his consent to be interestive and assid: official readily gave his consent to be interviewed, and said:

interviewed, and said:

"Counterfeiting is practiced more extensively than is generally known. In my official capacity my work has been almost entirely confined to unearthing counterfeiting places. It is almost impossible for me to say to what extent paper money is counterfeited, but I know that counterfeited every denomination is counterfeited. every denomination is counterfeited. Strange as it may seem, but one counterfeit \$20 gold piece has ever been discovered, and that was dated 1859. It was made as follows:

A GENUINE DOUBLE EAGLE Was sawed in two, one side being left thicker than the other. As much

Was sawed in two, one side being left thicker than the other. As much gold as possible was then scooped out of the thick side, and a mixture of platinum and some other metal substituted, to bring it up to the standard weight. It is what is known as a 'filled coin,' and is worth from \$7 to \$8. A \$10 gold piece filled in the same way is worth from \$3 to \$4.50. There are quite a number of \$10 counterfeits. The dates of those filled or counterfeited are 1841-47-49-55-61-75-79 and 80. The one considered the most dangerous is dated 1847. The first counterfeit half-eagle, or five-dollar gold piece, that the Secret Service discovered was issued in 1850, and no less than twenty-two have appeared since then, some of them being absolutely worthless, while others are worth from \$2.70 to \$4.63 each. The ones dated 1882 are the most skillfully executed counterfeits known. Gold pieces are not counterfeited so much as silver coins, for the reason that gold counterfeit coins are made from dies, and not cast. The manufacturers of the 'queer' must buy the gold, which requires, of course, considerable capital cast. The manufacturers of the 'queer' must buy the gold, which requires, of course, considerable capital, and the machinery is not only expensive, but of such large proportions as to render it liable to detection. In manufacturing counterfeit silver dollars, most any ingenious mechanic can do that after a little experience.

COINING THE 'QUEER. "The articles found in the house where the counterfeiters made their spurious money, were plaster of paris molds of genuine coin, britannia, block tin, lead and a silver wash. The men engaged in manufacturing these counterfeit silver pieces stole the lead pipe and the in the neighborhood old the at tapots, from which they got it metal and neighborhood old is a teapots, from which they got is metal, and the block tin they purchased in Boston. [The writer was permitted to examine twenty or twenty-five of these molds and dies for manufacturing different coins of the United States, and they were found to be fine pieces of workmanship.] During the past year new counterfeit silver pieces were discovered almost every other month. In a leather bag were about two hundred or three hundred silver dollars in the rough, that is, before they had been finished up and made ready for the market. They were made in New England. A number of others that had been finished, were shown, and it was almost impossible to distinguish the difference between the genuine and the spurious coin, so finely were the latter finished. They are detected by their general appearance and their weight. The weight test is the most the latter finished. They are detected by their general appearance and their weight. The weight test is the most accurate and reliable, especially with gold coin. The Treasury has a set of maximum and minimum weights, which distinguish the weight of all coins. For example, the maximum of a twenty-dollar gold piece is 516 grains, and the minimum 513.42 grains. The difference is exactly one-half of 1 per cent., the amount allowed by law.

allowed by law. Becomes light from natural causes, and when they come into the hands of the National Treasury they are sent to the mint and recoined, the Government bearing the loss. As a general thing nothing smaller than a ten-dollar gold piece is ever filled, though the smaller coins are plugged, which is, perhaps, the most common. A new process, however, has taken the place of plugging, to a great extent, and is called 'sweating.' Some photographers are credited with doing this kind of thing. The modus operand of this new process is to take a number of gold or silver pieces and suspend them in some acid for a few moments and then withdraw them. By using fresh coin a considerable quantity of metal is obtained without reducing the weight of the piece to A GREAT DEAL OF COIN quantity of metal is obtained without reducing the weight of the piece to any great extent, and they are then passed off again on the public. Sometimes as much as fifty cents in value is taken from a 55 gold piece, and as much as eighty cents has been known to have been taken from a double eagle. Another way of tampering with double eagle is to remove their rough edges and remill them. Between fifty and eighty cents can be obtained in this way from a single coin, and the difference is not perceptible to the naked eye."—[Boston Traveller.
